Patent No. 6640025

GENERAL INFORMATION:
APPLICANT: Berestein, Gabriel
TITLE OF INVENTION: METHODS OF ASSAYING FOR G
TITLE OF INVENTION: PROTEIN-COUPLED RECEPTOR LIGANDS AND MODULATORS
FILE REFERENCE: MNI-131
             Sequence 9940, Application US/09949016
Patent No. 6812339
GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS
FILE REFERENCE: CL001307
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Patent No. 6551795
GENERAL INFORMATION:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    SOFTWARE: FastSEQ for Windows Version 4.0 SEQ ID NO 6

Patent No. 6640025
GENERAL INFORMATION:
APPLICANT: Berselein, Gabriel
TITLE OF INVENTION: METHODS OF ASSAYING FOR G
TITLE OF INVENTION: PROTEIN-COUPLED RECEPTOR LIGANDS AND MODULATORS
FILE REFERENCE: MUI-131
CURRENT APPLICATION NUMBER: US/09/880,137
CURRENT FILING DATE: 2001-03-05
PRIOR APPLICATION NUMBER: US/09/86,706
PRIOR PRILING DATE: 2000-03-03
NUMBER OF SEQ ID NOS: 8
SOFTWARPE: Fastero for withdams Vaccious
                                                                                                                                                                                                                                                            PRIOR APPLICATION NUMBER: US 60/172,705
PRIOR FILING DATE: 1999-12-10
NUMBER OF SEQ ID NOS: 51505
SOFTWARE: FASTSEQ for Windows Version 4.0
SEQ ID NO 2512
LENGTH: 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    GENERAL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Best
